The sudden death of little Florence, the sparkling five-year old daughter of Dr. and Mrs. Thatcher, which occurred early Sunday morning last, May 27, 1900, was a great shock to all our people. The child had been ill less than one day, and then not at all time was her condition considered alarming until within a few hours before her death. Though so young, she had arrived at that age, that all her lovely qualities were only drawing the parents the neighbors and friends the closer to her. Not alone are the parents in their grief and bereavement, friends and neighbors alike sympathize, and other eyes have wept, and other heart strings have been made to vibrate by the strain laid on their own bloodied and stricken hearts. The sympathy of the entire community goes out for the afflicted parents in this, the hour of their sore trial. On Monday forenoon, the 28th ult., the little body was committed to the grave, there to rest until inspired with new life it shall come forth glorified, a fit dwelling place for the immortal spirit throughout eternity.

The child had been ill less than one day, and then not at all time was her condition considered alarming until within a few hours before her death. Though so young, she had arrived at that age, that all her lovely qualities were only drawing the parents the neighbors and friends the closer to her. Not alone are the parents in their grief and bereavement, friends and neighbors alike sympathize, and other eyes have wept, and other heart strings have been made to vibrate by the strain laid on their own bloodied and stricken hearts. The sympathy of the entire community goes out for the afflicted parents in this, the hour of their sore trial. On Monday forenoon, the 28th ult., the little body was committed to the grave, there to rest until inspired with new life it shall come forth glorified, a fit dwelling place for the immortal spirit throughout eternity.
